Lieu : **26 avenue de l'Opéra, 75001 Paris**

* * *

Nom de l'entreprise/entité

At the nexus of Venture Capital and Consulting, Aster Fab enables the needed transformation of hard-to-abate industries by tapping into the climate tech gold mine.

References include: EDF, Bouygues Construction, Suez, GTT, Vinci, Orano, Biogen, Terna, Alstom, Imerys, OMV, Plastic Omnium, Manitou, Motul, Horizon Europe...

Descriptif du projet

You'll be exposed to 4 types of studies

- Bold sustainable innovation priorities (focus area definition, need mapping, innovation portfolio modeling, investment thesis definition...)
- Impactful innovation instruments (audit, design, launch and/or pilot CVCs, accelerators, startup studios, call for applications...)
- Deal flow-as-a-service (technology mapping, climate tech startup scouting, rating, mapping collaboration scenarios, POC facilitation...)
- Transformative sustainable M&A and CVC deals (opportunity analysis, valuation, due diligence, deal execution...)

Méthodologie envisagée

You will

- Actively take part in all Aster Fab projects from start to finish:
 - Take part in client meetings (kick-off, bi-monthly and final meetings)
 - Conduct market research on a wide range of technology topics

-

- Scout for Climate Tech startups and score them using Aster Fab's well-established rating methodology
- Benchmark Open Innovation and Corporate Venture Capital best practices
- Conduct interviews with industry experts, venture capitalists, and entrepreneurs to gather insights
- Prepare educational workshops on various topics
- Draft studies on PowerPoint with a presentation of the research, highlighting the main insights and recommendations to the client
- Take part in Aster Fab's development
 - Contribute to business development efforts through the drafting of proposals
 - Take part in our offering definition and launch of new services
 - Contribute to the organization of online events to further build our reputation

You will work directly with Aster's management team to further develop your role.
