About Partech & the Impact Team

Partech is a global investment firm with offices in San Francisco, Paris, Berlin and Dakar. Partech has 5 investment strategies: Seed, Venture, Growth Digital, Growth Impact and Africa. We are a team of independent thinkers who are unconstrained by hype, trend, or fixed ways of working. We believe in the power of alliance in action, working together and side-by-side with the founders we back, and as a global team, in the shared pursuit of success.

Partech Impact is a €280m investment funds, and a leading pan-European Impact-native Tech Growth fund. Its aim is to offer investors exposure to high-growth European Impact-native tech companies without venture risk, i.e. with a first proof of a successful business model.
The objective of the fund is to invest and **support Impact-native x Tech, proven and scalable businesses in their Growth and Impact journey.**

About the internship

Recruit an intern (student in engineering) from September 2026 to July 2027, in Partech Impact team, with the objective to think / deliver tangible AI use cases for investment teams. 3 days Sept-Dec; 4 days Jan-March; 5 days April-July.

Scope of work (to be finalized upon arrival)

Focus on identifying and leverage AI on several investment processes, replicable across Funds.

- Sourcing:
  - Ability to find new sourcing opportunities (scrapping the web)
  - Building a score / fit of existing pipeline and opportunities depending on few criteria (to be discussed / determined)

- Investment / DD analyses. Take few common figures of analyses and automate steps / see how AI can support deal teams end-to-end:
    - Market analysis
        - Ability to build a first level of market sizing and growth and associated formalization into excel / pptx
    - Competitive landscape
        - Ability to build a first competitive landscape analysis based on a given template
    - Customer analyses
        - Ability to run cohort analyses and output (feasibility to be assessed)
    - Comparable transactions
        - Identify and build comparable pages / performance
    - Management discussion
        - Prepare a list of relevant questions to ask management on a first interaction based on an IM / P&L
- People reviews
    - Build an ability to automate memos / reports based on several inputs

Desired profile

Master PIC's student in engineering.

Governance and steering

Objective to work in Sprints, use case by use case.
Regular / ongoing coaching from Partech Impact team; bi-monthly check-in to review progress, identify / adapt use cases being worked on and discuss link with Partech IT / Tech architecture (if any).
